

Hello, Traveller!

You're about to embark upon an epic adventure, to join Joey Beamish and help her find clues, solve puzzles as she accidentally finds herself

Tunnelling Through Time!

So play solo, or gather your team either in person or over your favourite online video calling service, pour yourselves something cold and head to: www.tunnellingthroughtime.com/play

Use a desktop or laptop (we recommend Google Chrome), and when you are all ready to begin, enter your Tunnel Access Code:

S	I	A	S	-	B	W	L	I
---	---	---	---	---	---	---	---	---

See you in the future... Or in the past!

TIPS:

You should find help in-game if you get stuck. But if you still need further help or encounter technical issues, more assistance can be found here: www.tunnellingthroughtime.com.

If you need to pause the game (or accidentally close the tab), it will auto-save progress, so feel free to start and stop at any point!

You can choose how to play - We recommend one person logs in, shares their screen and 'drives' with everyone else helping to solve the puzzles and sleuthing the internet, or everyone on your team can also log in separately if you all prefer to do everything.

This game has a lot of video and audio, and it is recommended to be played with the sound ON. However, subtitles are available at each stage, should you require them. If you do share your screen we recommend headphones if you aren't in the same location!

Have fun!
